

Feature map, user journeys & the operating playbook.

Connect is the AI-first mobile app dealers use to catch every call lead, keep each store location accurate, and manage how their storefront looks online — while a companion admin system, Nova, approves anything sensitive. This is the single reference for what the app does, who does it, and how to run it day to day.

01 Who uses Connect

Four roles. Everything below is colour-coded to them.

Primary Dealer / Store Manager Runs a single physical store. Lives in the app all day — answering call leads, replying to reviews, keeping the listing sharp. Wants: not a single call, review, or walk-in to slip through.	Primary Multi-location Dealer One person, one phone number, several stores. Picks a store after login; the whole session focuses on it until they switch. Wants: to manage every store on one number without being locked out.
Roll-up Brand Hierarchy Cluster → City → Regional → State → Distribution Head. Sees a scorecard for everything below them and drills into any store. Wants: to spot the weakest location and act before it costs revenue.	Approver · in Nova Nova Admin / Brand Owner Sits in the companion Nova console. The single approval gate for sensitive requests raised by dealers. Wants: control over number changes, listing edits & media before anything goes live.

02 Feature map & journeys

Every feature, the tap-path to reach it, and who it serves. **+ AI** marks live Gemini surfaces.

FEATURE	WHAT IT DOES	JOURNEY PATH	FOR WHOM
ACCESS & IDENTITY			
Phone + OTP login	Sign in with a mobile number shown masked — one-time 6-digit code, no passwords.	Login > Enter number > OTP	Dealer Multi
Store selector	One number resolves to several stores; picking one scopes the whole session to that store ID.	OTP > Choose your store	Multi
Number-change request	New to the team or number changed? Raise a request routed to Nova admin for approval.	Login > Request access > Nova admin	Multi Admin
Switch store	Re-scope the session to a different mapped location at any time.	Home / Profile > Switch	Multi
HOME			
First-time welcome + AI	First login lands on an AI-narrated welcome scoped to the chosen store.	Store > Home (first visit)	Dealer Multi
What you missed	Returning users land on a since-last-login digest: missed calls, new negative reviews, health-score movement.	Home > tap a card	Dealer Multi
Store health & growth	Health-score ring, nearby competitor rank, and the next best task to climb it.	Home > Health card	Dealer Multi
VMN – CALL LEADS			
Incoming (real-time)	Call leads from the virtual number sync in live — no waiting for a refresh.	VMN > Incoming	Dealer Multi
Outbound callback queue	Missed high-intent callers ranked by chance-to-buy, ready to dial back via the VMN.	VMN > Outbound	Dealer Multi
Missed opportunities	IVR drop calls — people who hung up inside the menu before connecting — surfaced to win back.	VMN > Missed ops	Dealer Multi
AI call summary + AI	Generated on demand for a connected call — not a permanent placeholder.	VMN > Outbound > AI summary	Dealer
AI Call-Back Coach + AI	A tailored talk-track per lead so a slow response never loses the sale.	VMN > Incoming > lead > Coach	Dealer
Lead scoring (CLI)	Every caller gets a 0-100 “chance to buy” with a Hot / Warm / Cool / Cold band.	VMN > any lead card	Dealer
CUSTOMERS – MINI-CRM			
Customer profiles	Every caller & review recipient as a profile with a full interaction timeline.	Customers > a customer	Dealer
AI customer insight + AI	A short read on who the caller likely is and how to win them.	Customers > customer > AI tip	Dealer
KPI filters	Slice the list by Hot, Review-pending, or Total value at a glance.	Customers > KPI strip	Dealer

FEATURE	WHAT IT DOES	JOURNEY PATH	FOR WHOM
REVIEWS			
Inbox + AI reply + AI	Every review with a ready AI-drafted response to edit and post.	Reviews > Inbox	● Dealer
Generate review link + AI	Create a personalised review-request message to send on WhatsApp.	Reviews > Generate	● Dealer
NPS & sentiment	Store NPS, average rating, and promoter / passive / detractor split — deltas are text-only.	Reviews > Inbox header	● Dealer ● Brand
Leaderboard	Who generated the most reviews and landed the highest ratings.	Reviews > Leaderboard	● Dealer ● Brand
STORE PROFILE & MEDIA			
GBP listing check	Review name, address, Plus Code, hours, category & services; suggest fixes for team review.	Profile > Store location	● Dealer ● Admin
Fix-it with GPS	Standing at the entrance, share an accurate Plus Code straight from the phone.	Store location > Use my location	● Dealer
Location verification	Flags a pincode/state mismatch or a >20 m lat-long drift, then a presence-gated 4-step fix on-site.	Store location > Start verification	● Dealer ● Multi
Cover photo	Set and update the photo shown at the top of the Google listing.	Profile > Manage Media > Cover	● Dealer
Posts + AI	Brand-approved templates with AI-written, localised copy — submitted for approval.	Manage Media > Posts	● Dealer ● Admin
Image upload + compliance	Add or delete photos; blurred, selfie & low-res uploads are rejected at upload with a clear reason.	Manage Media > Photos > Add	● Dealer
Team & permissions	Primary admin adds users and sets per-user permissions for the store.	Profile > Team	● Dealer
BRAND HIERARCHY ROLL-UP			
Roll-up scorecard	Total & missed calls, callbacks and recovery-% for everything below the role.	VMN > scorecard (brand role)	● Brand
AI Executive Insight + AI	A plain-language read on which location lagged and who set the benchmark.	Scorecard > Exec Insight	● Brand
Ranked list + drill-down	Sort the level below by recovery, missed or volume, then open any single store.	Scorecard > ranked list > store	● Brand
ASSIST & SETTINGS			
AI Copilot orb + AI	A floating assistant grounded in this store’s live data — ask, draft, and act.	any tab > orb	● Dealer ● Brand
Push alerts	WhatsApp-style pings for a hot missed call, a bad review, and a daily summary.	Profile > Alerts	● Dealer
Appearance & language	Light / dark theme and the app — plus the AI — in any of 12 languages.	Profile > Appearance · Language	● Dealer ● Multi
Role switcher demo	Preview how the app adapts from a single store up to the distribution head.	Profile > Switch role	● Brand

03

End-to-end journeys, by user type

The same product, four different paths through it.

● Dealer

Single-store day

Owner / manager of one store, from open to close.

- 1 Sign in**
Masked number + OTP; lands straight in the store.
- 2 Catch up on Home**
“What you missed” — missed calls, bad reviews, health move.
- 3 Work the VMN**
Call back the ranked hot leads with the AI Coach; clear IVR drops.
- 4 Reply & request reviews**
Answer reviews with AI drafts; send review links to happy buyers.
- 5 Keep the store sharp**
Fix the listing, refresh media, ask the Copilot anything.

● Multi-location

One number, many stores

A dealer running several stores on a single line.

- 1 Sign in once**
Masked number + OTP as usual.
- 2 Choose a store**
All mapped locations listed; pick one to scope the session.
- 3 Run that store fully**
Home, VMN, Customers, Reviews, Profile — all focused on it.
- 4 Switch when needed**
Tap Switch on Home or Profile to jump to another store.
- 5 New / changed number?**
Raise an access request — Nova admin approves it.

● Brand hierarchy

Roll-up & drill-down

Cluster, city, regional, state or distribution head.

- 1 Open the scorecard**
VMN becomes a roll-up: calls, missed, recovery-% for the level below.
- 2 Read the AI insight**
Which location lagged, who set the benchmark this week.
- 3 Rank the field**
Sort stores by recovery, missed or volume.
- 4 Drill into a laggard**
Open the weakest store and see exactly what’s slipping.
- 5 Ask the Copilot**
“Show me unhappy customers this week” across the roll-up.

● Nova admin

The approval gate

Brand owner in the companion Nova console.

- 1 Receive a request**
A dealer’s number-change lands for approval.
- 2 Review & decide**
Approve or decline; the dealer is notified.
- 3 Vet listing edits**
GBP fixes suggested by dealers are checked before going live.
- 4 Backstop compliance**
Posts & media flow through the same single approval route.

The morning triage

START OF DAY

- 1 Open **Home** and read “What you missed since last login”.
- 2 Jump to **VMN > Incoming**, sorted by chance-to-buy.
- 3 Call the top 3 with the **AI Call-Back Coach** script.

RESULT The hottest leads are called back before noon.

● Dealer ● Multi

Recover a hot missed lead

REPEAT / HIGH-CLI CALL

- 1 In **VMN > Incoming**, open the lead (note the CLI band).
- 2 Generate the **Call-Back Coach** talk-track.
- 3 Dial back through the VMN — the call is recorded.

RESULT Lead converted or a store visit booked.

● Dealer

Rescue an IVR drop

CALLER HUNG UP IN MENU

- 1 Go to **VMN > Missed ops**.
- 2 Read where they dropped and the value at stake.
- 3 Tap **Call this lead back** before a competitor does.

RESULT Intent recovered that used to vanish silently.

● Dealer

Summarise a call, hands-free

RIGHT AFTER A CALLBACK

- 1 Open **VMN > Outbound > Recent calls**.
- 2 Tap **AI summary** on the call — generated on demand.
- 3 Act on the captured next step; no manual notes.

RESULT Every call has a follow-up without the paperwork.

● Dealer

Turn a happy call into a review

POSITIVE CALL OR SALE

- 1 Go to **Reviews > Generate**.
- 2 Create a **personalised link** with AI copy.
- 3 Send it on WhatsApp while the goodwill is fresh.

RESULT More 5-star reviews, a better nearby rank.

● Dealer

Defuse a negative review

NEW ≤2★ REVIEW

- 1 Catch it on the **Home** alert or **Reviews > Inbox**.
- 2 Open the **AI-drafted reply** and make it yours.
- 3 Respond within minutes.

RESULT Sentiment recovered, NPS protected.

● Dealer

Fix a flagged location

ADDRESS / PIN FLAGGED

- 1 Open **Profile > Store location** — read the flag reasons.
- 2 At the storefront, tap **Start verification** (presence-gated).
- 3 Correct address → snap the pin → geo-photo → GPS match.

RESULT An accurate pin and more location visits.

● Dealer ● Multi

Refresh the storefront

LISTING LOOKS STALE

- 1 Open **Profile > Manage Media**.
- 2 Set a clean **cover**; add photos — blur & selfies are auto-rejected.
- 3 Publish an AI-written **post** for the weekend.

RESULT An attractive, compliant listing on Maps.

● Dealer

Onboard or change a number

NEW / CHANGED NUMBER

- 1 On the login screen, tap **Request access**.
- 2 Enter the new number and a reason.
- 3 Send to **Nova admin** and wait for approval.

RESULT Access granted the moment the brand approves.

● Multi ● Admin

Weekly roll-up review

MANAGER CADENCE

- 1 Open the **scorecard** for the level below you.
- 2 Read the **AI Executive Insight**, then rank by recovery-%.
- 3 Drill into the laggard and assign the fix.

RESULT Effort aimed at the store that needs it most.

● Brand

Ask the Copilot

ANY QUESTION, ANY TAB

- 1 Tap the floating **AI orb**.
- 2 Ask in plain words — “which leads first?”, “unhappy customers this week?”.
- 3 Get a grounded answer, or let it draft the action.

RESULT The whole store, answerable in one sentence.

● Dealer ● Brand

SingleInterface Connect — dealer app · companion admin: Nova. Nav: Home · VMN · Customers · Reviews · Profile. AI surfaces run on live Gemini with graceful fallbacks.

Reference compiled from the working prototype · every path above is tap-for-tap accurate to the app.
